

# Cloud Router Switch

---

## 8 port device series

The CRS is a highly configurable switch, powered by RouterOS. Several models are available in the 8 Gigabit port series:

- CloudRouterSwitch 109-8G-1S-2HnD-IN
- CloudRouterSwitch 112-8G-4S-IN
- CloudRouterSwitch 210-8G-2S+IN
- CloudRouterSwitch 212-1G-10S-1S+IN

## Powering

The devices accept power in the following ways:

- direct-input power jack: 8-56V (24V 0.8A PSU included),
- passive PoE input: 8-56V (injector included).

Except for CRS212-1G-10S-1+IN, which only accepts 8-30V direct input, with no PoE input support.

## Extension slots and ports

- *Except for CRS212: Eight (8) 10/100/1000 (Gigabit) Ethernet ports (Auto MDI/X).*
- *For CRS109: One SFP cage, compatible with 1.25G SFP modules, Built-in 802.11b/g/n 2GHz wireless access point.*
- *For CRS112: Four SFP cages, compatible with 1.25G SFP modules.*
- *For CRS210: Two SFP+ cages, SFP+1 compatible with 1.25G and 10G, SFP+2 compatible 10G SFP modules only.*
- *For CRS212: Ten SFP cages, one SFP+ cage, one Gigabit Ethernet port.*

*The device is equipped with an RJ45 serial port, set by default to 115200bit/s, 8 data bits, 1 stop bit, no parity. Standard RJ45 to COM cable can be used, pinout can be found here: [http://wiki.mikrotik.com/wiki/Manual:System/Serial\\_Console#RJ45\\_type\\_serial\\_port](http://wiki.mikrotik.com/wiki/Manual:System/Serial_Console#RJ45_type_serial_port)*

## Configuration

Once logged in, we recommend clicking the “Check for updates” button in the QuickSet menu, as updating your RouterOS software to the latest version ensures the best performance and stability. For wireless models, please make sure you have selected the country where the device will be used, to conform with local regulations.

RouterOS includes many configuration options in addition to what is described in this document. We suggest starting here to get yourself accustomed to the possibilities: <http://mt.lv/help>. In case IP connection is not available, the Winbox tool (<http://mt.lv/winbox>) can be used to connect to the MAC address of the device from the LAN side (all access is blocked from the Internet port by default).

For recovery purposes, it is possible to boot the device from the network, see a section Reset button.

## Default configuration

- **CRS109-8G-1S-2HnD-IN**: ports 2-8 are switched, wireless interface and switch are bridged, and bridge contains a DHCP server. Eth1 and SFP1 have DHCP client configured.
- **All other models** all the ports are switched.

Both models can be accessed through the IP **192.168.88.1**, the username is **admin** and there is **no password**. Please connect with your web browser to this IP address to configure it. See this page for connection and configuration guides: <http://wiki.mikrotik.com/wiki/Category:Manual>

## Reset button

The reset button has three functions:

- Release the button when green LED starts flashing, to reset RouterOS configuration to defaults.
- Release the button when the LED turns solid green to clear all configuration and defaults.
- Release the button after LED is no longer lit (~20 seconds) to cause a device to look for Netinstall servers (required for reinstalling RouterOS over the network).

Regardless of the above option used, the system will load the backup RouterBOOT loader if the button is pressed before power is applied to the device. Useful for RouterBOOT debugging and recovery.

## Operating System Support

The device supports RouterOS software with the version number at or above what is indicated in the RouterOS menu `/system resource`. Other operating systems have not been tested.

## Federal Communication Commission Interference Statement

FCC ID:TV7CRS109-8G2HND

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC Caution:** Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device and its antenna must not be co-located or operation in conjunction with any other antenna or transmitter.

**IMPORTANT:** Exposure to Radio Frequency Radiation.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and any part of your body.

## MPE statement

This equipment complies with EU radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body, unless specifically stated otherwise in page 1 of this document. In RouterOS you must specify your country, to make sure local wireless regulations are observed.

## Frequency bands terms of use

Frequency range (for applicable models)	Channels used	Maximum Output Power (EIRP)	Restriction
2412-2472 MHz	1 - 13	20 dBm	Without any restriction to use in all EU Member States
5150-5250 MHz	26 - 48	23 dBm	Restricted to indoor use only*
5250-5350 MHz	52 - 64	20 dBm	Restricted to indoor use only*
5470-5725 MHz	100 - 140	27 dBm	Without any restriction to use in all EU Member States

\* It is the customer's responsibility to follow local country regulations, including operation within legal frequency channels, output power, cabling requirements, and Dynamic Frequency Selection (DFS) requirements. All Mikrotik radio devices must be professionally installed!
