

REV6P Series

The REV6P series is an affordable performance loudspeaker designed exclusively for in-ceiling home theater installations. This series also uses the latest version of the frameless Ghost grill in black and white. The Ghost grills are TruAudio exclusive designs that make installing go from minutes to seconds and give the speaker a frameless, almost flush mount look. The REV6P-LCR.1 and .2 can be used as center, left and right channels, they are acoustically matched with the REV6P-SUR.1 model. The REV6P models feature a full-range design that can be also used for 2 channel audio listening.
