DESIGNED FOR LONG-RANGE, HIGH-CAPACITY AND HIGH-DENSITY DEPLOYMENTS

Cambium Networks' 60 GHz cnWave solution provides easy, fast and cost-effective wireless gigabit connectivity for edge access and/or high-capacity backhaul for edge access solutions at a significantly lower TCO than fiber infrastructure. Service providers and enterprises now have access to gigabit for business and residential connectivity, backhaul for Wi-Fi access or LTE/5G small cell. Certified for Facebook Terragraph, cnWave solutions are highly efficient at handling high-density deployments in cities and suburban areas.

V3000 is featured with a 44.5 dBi or 40.5 dBi high-gain antenna with beamforming. The Client Node (CN) can be used as either a client in PMP configurations or an end-point in PTP configurations.

cnMaestro READY
